Investment Objective

To provide long-term capital growth as a primary goal, with capital preservation as a secondary objective.

Investment Strategy

The portfolio is invested in a growth-oriented mix of securities that seeks to earn a good portion of the long-term growth of the stock market with less volatility. Holdings are diversified primarily among various stock investments, as long as stock market valuations are favorable versus long-term bond yields. A substantial portion of the fund may be invested in long-term, fixed income securities.

The fund manager will adjust the investment mix over time to manage risk by continually evaluating individual securities and market conditions to determine the relative attractiveness of each investment. In general, stock exposure will increase when valuations are low and decrease during speculative markets.

About Risk-Based Funds

Risk-based funds offer professional management and asset allocation to retirement plan participants through a choice of investment objectives that range from fairly aggressive to fairly conservative. All a participant has to do is determine which objective best suits his or her current risk tolerance and investment time horizon, then decide when to move to a more conservative objective as his or her personal situation changes over the years.

Time Horizon and Range of Stock Exposure

Maximum Term	Extended Term	Moderate Term	Conservative Term
15+ Years	7 - 20 Years	3 - 10 Years	0 - 5 Years
70% - 95%	40% - 70%	20% - 60%	5% - 35%

May be appropriate for investors:

- Who want to be invested in long-term assets without full market risk
- Who have a reasonably high capital risk tolerance

A Word About Risk

All investments involve risks, including possible loss of principal. Because the fund invests in both stocks and bonds, the value of your investment will fluctuate in response to stock market movements and changes in interest rates. Investing in the fund will also involve a number of other risks, including issuer-specific risk, foreign investment risk, and small-cap/mid-cap risk. Investments in options and futures, like all derivatives, can be highly volatile and involve risks in addition to the risks of the underlying instrument on which the derivative is based, such as counterparty, correlation and liquidity risk. Also, the use of leverage increases exposure to the market and may magnify potential losses.

About the Fund Manager

This Fund is a collective investment trust (CIT) maintained by Exeter Trust Company (ETC), as Trustee, for investment only by certain qualified employee benefit plans. CITs are not mutual funds, and their units are not registered under the Securities Act of 1933, or applicable securities laws of any state or other jurisdiction. CITs are exempt from registration and regulation under the Investment Company Act of 1940 (the "1940 Act"), and unit holders are not entitled to the protections of the 1940 Act. ETC has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act and, therefore, is not subject to registration or regulation as a pool operator under said Act. ETC is responsible for voting proxies for securities held in the CITs. Proxies will be voted and recorded in accordance with ETC's proxy voting policy, although ETC may solicit recommendations and advice from unaffiliated proxy advisory firms, or other advisors or sub-advisors which it retains with respect to the CITs. This Fund is not FDIC-insured, may lose value, and is not guaranteed by ETC, any of its affiliates, or any other bank or government agency.
